

State of nonpoint source pollution

Various sources and magnitude (including cattles)

Air pollution (particulates)

Vehicle emission

Lake oxidation (evaluation of effectiveness)

State of point source control

Sewerage (coverage and efficiency)

Primary, secondary, tertiary?

Centralized treatment for industries?

Idle emersion (state of pollution, measures taken,...)

State of detergent use and their impacts

Washer (doby)

Impact on water

Impact on cloth washed

Impact on health

Inadequte measures (trash in creaks, etc.)

Solidwaste

Deforestation, Reforestation/afforestation

Educating the young

Barrage

Aesthetic things like roads covered by trees

Encouraging signs

Public education and its impact on cleaning up the environment

Pay toilets (good)

Continuous improvement in pavements (good)

Wrapping not done much

Jaladindi

Public gathering, spreading the words

Communication with satellite dish....communication difficult?

Malaysia

Changing the environment takes time

Sense of national pride

Green areas

Eutrophic lake (it used to be not so bad)

Lake Putra Jaya

Can say a lot of good things (we have a brief)

Lots of greens

Tasek Kenir

Extent of different uses not clear (lack of communication among users?)

Sewage of the boat people?

Water quality looked pretty good

Chini Lake

Thick plant islands

Sewage?

Aborigini (good clues? Living with nature or adverse impacts)

Bank erosion

Durians

Palm oil trees

Bukit Mela Lake

Reflection in waters

Dams

Lake fisheries

Extent of eutrophication

Floating logs in the dam site

Silty water

Russia

Streets clean

Lots of green space

Taiga forests

Islands

religion and water

plastic cups

Pushkov

Novgodro

Boat ride
